

Stepan Dolgintsev

Software Engineer

stepandolgintsev@gmail.com | github.com/axidex | t.me/axidex | leetcode.com/axidex | axidex.github.io/personal-page

Summary

Software Engineer building AppSec features at Yandex SourceCraft. Background in DevSecOps: secret scanning, SAST and API fuzzing at production scale. Upstream contributor to Trivy, Gripe and Syft. Open to worldwide remote opportunities.

Experience

Yandex

Jun 2025 — Present

Software Engineer · Full-time · Hybrid

- Developing AppSec features at [SourceCraft](#), Yandex's developer platform.

Go · Kotlin · Quarkus · Hibernate · MongoDB · PostgreSQL · Helm · TDD · DDD

Sberbank

Aug 2023 — May 2025

DevSecOps · Full-time · On-site

- Designed and implemented a secret scanning service integrated into CI/CD (~6,500 scans/week).
- Developed and launched a SAST service based on Semgrep and CodeQL.
- Designed and developed an API fuzzing tool for RESTful APIs.

Go · Python · Groovy · Gin · FastAPI · GORM · SQLAlchemy · gRPC · Kafka · PostgreSQL · Helm · Istio · Prometheus · Grafana · Tempo

Open Source

Merged upstream contributions to the supply-chain security scanners I work with daily — [Trivy](#) (37k stars), [Gripe](#) (12k), [Syft](#) (9k) — covering SARIF reporting (CVSS vectors, PURLs, fallback descriptions) and Go module path parsing.

Skills

- Languages & Frameworks** — Go, Kotlin, Python; Gin, FastAPI, Quarkus, GORM, Hibernate, SQLAlchemy, gRPC.
- Infrastructure** — Kubernetes, Helm, OpenShift, Docker, Istio, Kafka, PostgreSQL, MongoDB, S3, Redis.
- Observability** — Prometheus, Grafana, Tempo.
- Security** — SAST (Semgrep, CodeQL, Checkmarx), secret scanning (Gitleaks, DeepSecrets, Kingfisher), SCA (Trivy, Gripe, Syft), API fuzzing.
- Architecture** — DDD, TDD, SOLID, ACID, BASE.

Projects

vercraft-go

2026

Language-agnostic CLI that derives a SemVer version straight from git history and `release/` branches — no tag zoo, no per-language build plugin. Go port of [orchestr7/vercraft](#). [source](#)

Go · git · SemVer · CI/CD

Gradle License Compliance Plugin

2026

Gradle plugin that scans dependencies, reads license info from POM files and verifies it against a defined policy. Published to Maven Central. [source](#)

Kotlin · Gradle · Maven Central

Kotlin vs Golang — benchmark

2026

CRUD performance comparison of Quarkus (Kotlin) vs Gin (Go) with PostgreSQL, Prometheus and Grafana. [source](#)

ECIES Educational Application

2024

Interactive tool for learning the Elliptic Curve Integrated Encryption Scheme. [source](#)

Secret Scanning Engine

2023

Engine for searching secrets and credentials in source code repositories. [source](#)

Retouching Module

2022

Implementation of the FabSoft paper — face beautification via dynamic skin smoothing. Python module written in C++. [source](#)

Education

MIREA — Russian Technological University

Graduated 2026

Information Security (Specialist)
